

SPECIFIC TERMS AND CONDITIONS FOR THE SALE OF ELECTRICITY FROM A DESIGNATED ELECTRICITY SUPPLIER TO CONSUMERS (REV. 2)

SPECIFIC TERMS AND CONDITIONS drawn up by Svensk Energi. The terms and conditions have been prepared by agreement with the Swedish Consumer Agency. These terms and conditions relate to the sale of electricity to consumers that have been assigned an electricity supplier by the electricity grid operator pursuant to Chapter 8 of the Electricity Act (1997:857).

1a. Commencement of delivery and conclusion of an agreement when the facility is not connected

The supply of electricity begins immediately when the consumer confirms that they accept the terms of the delivery and the reasonable collateral that may be requested, where applicable. The agreement applies from the commencement of the electricity supply unless special collateral has been requested. In the latter case, the agreement applies from the time the requested collateral has been received.

Requested collateral must have been received no later than five working days after the start of the delivery.

If the requested collateral has not been received within five working days, the electricity supply may be immediately shut down.

1b. Regulation of the supply when the facility is connected

If the transmission of electricity is not shut down and the consumer begins to withdraw electricity without a supply

agreement in place, the consumer must, according to the Electricity Act, still pay the designated electricity supplier for the electricity in accordance with the conditions applied by this supplier.

When the electricity supplier has been informed that there is an electricity user that is withdrawing electricity, the electricity supplier must immediately send out the terms for the delivery with a request for collateral to be provided, where applicable. The agreement applies from when the consumer has received the terms, unless special collateral has been requested. In the latter case, the agreement applies from the time the requested collateral has been received.

If collateral is requested in accordance with EL 2012 K (rev. 2), point 4.4, it must have been received no later than five working days after the consumer has been notified that collateral has been requested.

If collateral has not been received within the specified time, what is stated in 1a, third paragraph applies.

2 Requirement for delivery

The supply of electricity requires the consumer's installation not to be disconnected due to an issue of non-payment or other breach of contract with the electricity grid operator.

3 Prices

Prices for electricity supplied are presented in the attached price list.

4 Reconnection

If the consumer has committed a material breach of contract against the designated electricity supplier and the consumer's installation has been disconnected in accordance with the provision in EL 2012 K (rev. 2), point 5.2, what is stated below applies.

Reconnection takes place only when the consumer has fulfilled all of their obligations under the agreement and has paid reasonable compensation to the designated electricity supplier for the costs resulting from measures relating to disconnection and reconnection.

Reconnection must also be done if the remaining negligence is insignificant.

5 Other

Otherwise, the General Terms of Agreement EL 2012 K (rev. 2) apply in applicable parts.
